

**ICity Rate: a path to smart city**

ICity Rate is the annual report produced by PA Forum in cooperation with Istat, Unioncamere and some of the associations that deal with participation and active citizenship, which draws up the list of cities most smart seat of Italy, analyzing more than 100 indicators, useful to describe the situation in six different sizes: Economics, environment, governance, mobility, quality of life and social capital.

What are, now, the strengths and weaknesses for each area?

What are the cities in the past year have made progress in the path to smart city and which ones are back?

The report is printed by accessing the Link:
